Reference for Thomas Heidkamp

I discovered Thomas through a small advertisement in a local paper. I wanted to compare how much a kitchen that was exactly what I wanted, rather than the kitchen a large supplier wanted me to have, would cost me.

Thomas came to the house to discuss the project with me. Thomas was very careful to listen to the plans that I had in mind. He tactfully point out those suggestions that he felt would not work well and was very keen to facilitate my ideas, which he felt he could produce to his own high standards. He brought samples of his previous work and unprompted left me several references which all spoke very highly of his work. I was able to follow these up. At no time did I feel under any pressure to accept Thomas' work or advice.

Both my husband and I were very impressed by his quote and his approach to our somewhat chaotic requests. He is not easily fazed and despite the fact that we have moved the goal posts several times he continues to be very approachable to our flashes of inspiration. Throughout, his work has been well planned, carefully executed and beautifully finished off. Thomas is very attentive to detail. His skill in working with wood and other materials is very obvious in the finished product. Our kitchen has already drawn several compliments and we are thrilled with the high quality product that Thomas has produced.

Thomas is reliable and trustworthy. We would be very happy to let him work in our house in our absence. I have already passed his name on to several friends without hesitation and I would be very happy to discuss his work with anyone who was considering using him.
